NOTICE OF REVISION TO PROPOSED CEASE AND DESIST ORDERS R3-2006-1000 THROUGH R3-2006-1049

The Prosecution Team of the Central Coast Regional Water Quality Control Board (Central Coast Water Board, or Water Board) has decided not to recommend bimonthly septic tank pumping at this time. We have consulted with the Air Pollution Control District. APCD representatives are concerned that bimonthly pumping of approximately 4300 septic systems may cause significant adverse impacts. The Prosecution Staff intends to continue working with APCD on this issue, and, if necessary, study potential impacts of pumping requirements. We may recommend the Water Board require a pumping regime in future orders after further consideration of these issues.

At the April 28 hearing, the Prosecution Team will recommend the Water Board wait until it has additional information before considering this requirement. A copy of the revised Cease and Desist Order template is attached. This revision does not change the scope of the hearing, unless the Chair issues a revised hearing notice or hearing procedures. The Central Coast Water Board may still decide to consider issuing pumping requirements at this time.
